

Koh Jum Beach Villas

Sustainability Report 2026

Published September 2026 | Reporting period 1 January 2025 to 31 August 2026

Our Approach

Koh Jum Beach Villas is a low density, Travelife Gold certified beachfront resort on Koh Jum, Krabi Province, Thailand. We believe travel should leave a place better than it was found. Our work follows regenerative principles: restore the land we look after, strengthen the community we belong to, and reduce our footprint year on year. We choose continuous improvement over rapid expansion.

Our Commitments

Climate and biodiversity. We are committed to reducing our greenhouse gas emissions and to protecting and restoring the natural ecosystems of Koh Jum, on land and along our shoreline.

Human rights. We are committed to respecting and protecting human rights. Everyone who works with us, stays with us or lives alongside us deserves fair treatment, dignity and respect. All team members receive training on preventing discrimination every year.

Child safeguarding. We are committed to safeguarding the welfare of children and young people. Our policy is to always report suspected child exploitation or abuse to the police and the relevant authorities.

Progress Against Our 2025 to 2026 Objectives

Renewable energy. Throughout the reporting period, our solar system operated at 38kW, generating 43,530kWh in 2024, 41,660kWh in 2025 and 28,010kWh between 1 January and 31 August 2026. In October 2026, a further 48kW of solar capacity became fully operational, bringing our total to 86kW. This more than doubles our renewable capacity and will significantly reduce our reliance on grid electricity.

Single use materials. Refillable in villa amenities are fully in place. Amenities are bought in bulk and decanted on site, and our Botanical Amenities Collection is offered in 100ml biodegradable,

wheat based bottles. All organic transition goals from our 2024 Sustainability Plan have been achieved. Since January 2026, all orders from local island shops are supplied without single use plastic.

Community education. Our education programme with local schools has continued throughout the period, with at least two sessions each year reaching 85 students. Around 90% of our team are local residents, and we continue to grow our partnerships with local suppliers and the Chao Ley community.

Biodiversity. Over 1,000 seedlings were planted in 2025. Our gardens are tended through regenerative pruning and replanting from on site cuttings, prioritising biodiversity and soil health.

Water. Water use is monitored regularly to find further efficiencies. Consumption fell from 0.44m³ per guest in 2024 to 0.16m³ per guest in 2025, a reduction of around 64%.

Low density tourism. Between 1 January and 31 December 2025, we welcomed 12,872 guests across 3,854 room nights, with average occupancy of approximately 42%. This reflects a deliberate choice to keep visitor numbers in balance with the island.

Our Goals

Climate goal. Reduce greenhouse gas emissions from energy, water and waste by 25% per guest night by 31 December 2030, against our 2025 baseline. This target is in line with a 1.5°C science based pathway. In 2026 and 2027 we will focus on optimising our solar energy use and improving water and waste management.

Water goal. Reduce water consumption by 37.5%, from 0.16m³ to 0.10m³ per guest, by 31 December 2030, against our 2025 baseline.

Biodiversity goal. Plant 2,500 native seedlings by 31 December 2026, prioritising coastal species such as *Barringtonia asiatica* and *Terminalia catappa*, and continue this planting programme through 2027.

Community goal. Deliver at least two education sessions each year at Ting Rai School and Koh Jum School through to 31 December 2027.

Join Us

Regenerative travel is a shared practice, and every stay plays a part. We warmly invite our guests, team, suppliers and partners to support our goals:

- Follow the reminders in your villa on saving water and energy, and switch off air conditioning and lights when you step out.

- Use our refillable amenities and help us keep single use plastic off the island.
- Choose experiences that support local livelihoods, such as our Chao Ley cultural tour and organic garden tours.
- Share your ideas and feedback with our team, or write to us at info@kohjumbeachvillas.com.

Reporting Concerns About Children

If you have any concern about the exploitation or abuse of a child, please report it:

- Royal Thai Police: 191
- Tourist Police: 1155 (English speaking)
- Prachabodi Centre social assistance hotline: 1300 (24 hours)

You may also speak to our Reception or Management team, who will report the matter to the authorities.

Closing Statement

Koh Jum Beach Villas remains committed to tourism that restores rather than depletes, supporting the island's ecosystems, its community and its long term resilience. Thank you for being part of it.
